COUNTY ESTIMATES

County estimates are published annually by the New York Agricultural Statistics Service for a number of crops, livestock, and farm land use categories. Acreage, yield, and production estimates are made for corn, oats, wheat, and hay. Livestock estimates include the December 1 inventory of hogs and pigs and the January 1 inventory of cattle, beef cows, milk cows, and sheep and lambs on farms, plus the annual average number of cows and total milk production. County estimates of the number of farms and total land in farms, include a breakout of cropland, permanent pasture, and woodland acreage.

Several important sources of information provide the basis for these annual county estimates. Preliminary estimates of crops, farm land uses and livestock numbers are developed from a large scale survey at the end of each year in which over 10,000 farmers across the state are contacted. County acreage information from the Farm Service Agency also receives consideration in preparing several crop estimates. Annual milk production per cow is based on the combined results of milk production surveys conducted monthly throughout the year. Also, state and federal milk marketing order data by county are used in estimating cow numbers, rates of production, and total milk produced.

Revisions, if necessary, are made after considering data that become available after the original estimates are prepared. These include administrative data such as milk marketing receipts and the Census of Agriculture. The Census of Agriculture, collected and published every five years, does not make allowance for incompleteness at the county level. For this reason census numbers are generally lower than data published in this publication.

County estimates prepared by the New York Agricultural Statistics Service include allowances for farmers not sampled, non-respondents and inaccessibles. Milk production totals that exceed reported marketings include a small quantity of milk used on farms where produced. All county level estimates add to state level data shown elsewhere in this publication.

The farm definition for the Census of Agriculture and the Department of Agriculture's (USDA) NASS official estimates of farms are now the same. That is, a farm is any establishment from which \$1,000 or more of agricultural products were sold or would normally be sold during

the year. Over the last five years, there have been some substantial changes in the farm definition so that the Census of Agriculture and NASS official series would have the same definition. In addition, new industries were added to both counts because of the implementation of the new North American Industry Classification System (NAICS).

The following changes were made to ensure comparability between the Census of Agriculture data and the annually published NASS estimates. Beginning in 1995, NASS survey interviewers counted operations having five or more horses or ponies and no other agricultural sales as farms. An operation with one or more horses with agricultural sales of at least \$1,000 already qualified as a farm on both the NASS survey and the Census. Beginning with the 1997 Census of Agriculture, Christmas tree farms and farms that were wholly enrolled in the Conservation Reserve Program were included in the census farm count to coincide with the NASS official estimates. Two new industries, Maple Syrup and Short Rotation Woody Crop farms, were added to both counts beginning in 1997 as a result of NAICS.

All the changes in the farm definition occurring over the last five years were carried back to 1993 and included in the 1993-97 estimates. This "level" change ensured comparability not only between the Census of Agriculture data and the annually published NASS estimates, but also between years within this publication. This publication provides five years of consistent estimates. Because of these changes in the farm definition, the official estimates show a sizeable difference in the number of farms between 1992 and 1993 in some counties.

F FARMS, FARMLAND AND MAJOR CROPS

County Estimates

1992-1998

F FARMS AND FARMLAND UTILIZATION

The number of farms in New York (*places selling \$1,000 or more of agricultural products in a year*) totaled 38,000 in 1998, equal to a year earlier. Total land in farms remained at 7.80 million acres. Farmland accounts for 26 percent of the State's total land area.

Total cropland stands at 4.98 million acres and accounts for 64 percent of total land operated. Harvested cropland at 3.77 million acres represents 48 percent of total land

operated. Field crops such as corn, hay, haylage and greenchop, small grains, potatoes, soybeans and other field crops account for 93 percent of the total cropland harvested. Vegetable crops make up 4.1 percent and fruit crops 2.6 percent.

Estimates of farmland utilization are shown in table 1 below. The estimates are based on annual surveys with about 10,000 farms reporting each year.

Table 1. FARMS AND FARMLAND: Number of Farms, Land in Farms and Land Use,
New York, 1992-1998

Item	1992	1993	1994	1995	1996	1997	1998
Number of farms	38,000	38,500	38,500	38,000	38,000	38,000	38,000
Acres per farm	216	210	205	208	205	205	205
<i>Thousand acres</i>							
Land in farms	8,200	8,100	7,900	7,900	7,800	7,800	7,800
Cropland, Total	5,140	5,080	5,000	5,000	4,980	4,980	4,980
Cropland harvested, Total <u>1/</u>	3,768	3,749	3,808	3,700	3,730	3,760	3,770
Field crops harvested	3,522	3,503	3,562	3,446	3,482	3,510	3,519
Vegetable crops harvested	143	143	144	155	146	152	154
Fruit crops harvested	103	103	102	99	102	97	97
Cropland Pasture	720	700	690	710	700	680	670
Other Cropland	652	631	502	590	550	540	540
Permanent Pasture <u>2/</u>	740	710	680	680	670	670	670
Woodland <u>3/</u>	1,700	1,660	1,600	1,600	1,560	1,560	1,560
Other Land <u>4/</u>	620	650	620	620	590	590	590

1/ Beginning with 1992, field crops harvested and cropland harvested includes acres harvested only for haylage or greenchop.

2/ Excludes cropland and woodland pasture.

3/ Includes woodland pasture.

4/ Includes house lots, ponds, roads, waste, etc.
